

# TRANSVOSTOK

Freedom of Your logistical solutions

*All types of transport, any type of cargo, any direction, any format!*

## OVERSIZED CARGO

 France  Russia  Poland  Ukraine  Cyprus

**FREEDOM OF YOUR LOGISTICAL SOLUTIONS!**

More than 10 years of experience in international logistics, professionalism of road, air, rail and sea freight departments staff, gives us the opportunity to organize and accompany the cargo transportation of any complexity anywhere in the world.

Individual approach to each Customer, the willingness to find a solution for the situations of any complexity, providing a full range of accompanying services – components of a convenient partnership, which we consistently develop.

Representative offices in France, Russia, Poland, Ukraine and Cyprus, about 400 agents all around the world allow us to develop, organize and control the logistics processes in communication between the countries of Europe, Asia, Africa and South America.

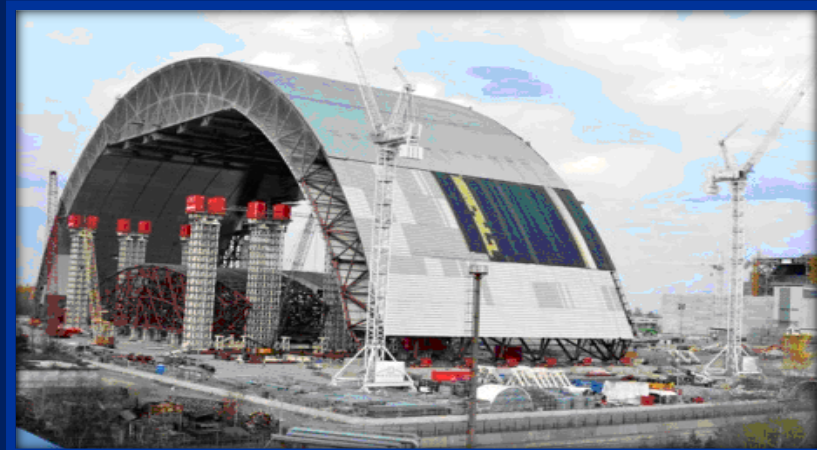

Since the beginning of the company's activity, our specialists have been focused on finding solutions to logistical situations of high complexity.

Among them - the international transportation of oversized cargo. To date, the delivery of oversized cargo reached 30% of the total volume of executed shipments.

We received rich experience in working with this kind of cargo in collaboration with companies designing and executing a construction project of Chernobyl's New Safe Confinement (NSC or New Shelter).

Since 2008, throughout this project we have organized more than 750 shipments of oversized cargo from Spain, Italy, France, Germany, Holland, Belgium, Poland, USA.

Our successful mutually beneficial cooperation continues.
